

## Group Payment Option: Electronic Device Protection

Worth Ave. Group offers a convenient way to protect valuable student technology.

**Never stress over broken devices again!** Make sure student devices are protected with a policy from Worth Ave.

Group. We have developed a program for schools and districts to provide electronic device protection for students without all the hassle. Group Payment Option (GPO) is a voluntary program that allows parents to purchase coverage for student devices easily online! Schools can provide students with valuable coverage for laptops, Chromebooks, tablets and more without the stress of traditional group insurance programs.

**GPO Landing Page:** Customized with school name and logo, a landing page is created and hosted by us!

**Full Control to School:** Families pay for protection, while the school maintains and manages the coverages and claims.

**Payment Processing:** All payments are processed securely via our website! Schools will not be required to collect premiums.

**Multiple Devices:** GPOs can provide purchase options for multiple devices on the same landing page.

**Custom Applications:** Custom fields can be added to the application like student ID or grade level.

**Custom Messages:** Specified instructions or messages can be added to the landing page as requested by the school.

**Enrollment End Dates:** Require parents to get coverage before the school year starts.

**Receipts & Reporting:** Order confirmations are sent to parents via email. Enrollment reports are provided to the school when GPO ends.

### Worth Ave. Group Covers All Device Types:

Chromebooks

iPads

Laptops
